AEROELITE

The AeroElite steel-reinforced composite body has a lower sound transmission rate which offers a quieter ride and improved insulation.

Large overhead storage bins keep smaller carry-ons safely out of the way

Aerodynamic front cap accommodates signage, large lockable storage or viewing window

Available on Ford F550 and Navistar chassis with gas, diesel, CNG and electric options.

Entry stepwell features a sturdy hand-rail and LED guide lights for added safety.

At ElDorado, we constantly improve our product and reserve the right to change specifications without notice. Some features shown are non-standard upgrades.

The largest of the ElDorado "Aero" product line, the AeroElite accommodates up to 33 passengers. The AeroElite's steel-reinforced composite fiberglass body, built on two heavy-duty chassis options, is highly rust, impact and corrosion resistant with a sleek style that withstands time and the toughest of environments.

Safety is essential. As such, ElDorado is one of the most highly tested products in the industry. Our steel-reinforced structure demonstrates both exceptional impact resistance and the ability to dissipate versus absorbing energy. This ability both minimizes and localizes structural damage in the event of an impact resulting in greater passenger safety and reduced repair costs.

Premium features such as an easy to use EP4 modular electrical system, 1,000 hour salt spray primer, tinted windows, commercial seats, and all LED lighting come standard or available on every vehicle. With many specialized options available, we can build the ideal blend of beauty and durability for your specific applications.
