

GRECH
MOTORS

Innovation. Quality. Style.

GM45

Distinction by Design

We create distinction by the superior design and quality in every Grech Motors bus we build. Our US design and utility patents reflect our commitment to innovation, giving our buses the form, function and standout curb appeal they are known for.

Safety is Paramount

We use a high-strength steel tube frame with 360° welding, tempered glass windows and aircraft-grade aluminum sidewalls among many other safety features, to build the safest midsized bus on the market.

GRECH MOTORS

GM28
F450 Chassis

6.7L Power Stroke diesel engine & 6.8L Triton V10 gas engine (Gm28)
110,000 BTU (Gm33) & 90,000 (Gm28) roof mounted HVAC, fully
welded steel tube cage, riveted aircraft grade aluminum body,
