

KSIR® Pro Cutaway E-Series

The **KSIR Pro Cutaway Bus** is rated as the quietest ,best riding bus of all the buses in the E-series category. This is due to our custom, hand built construction featuring Galvaneal steel exclusively including the body cage, subfloor, roof trusses, and even the step wells. Thicker Frameless windows and R4.5 density block insulation in the walls effectively block out road noise while keeping the passengers cool in the summer and warm in the winter.

The optional Sumo front springs and rear springs provide excellent stability in cross winds, reduces body lean in cornering and exit ramps. It also greatly reduces “nose dive” during heavy braking.

The “Draft Free” rear A/C unit is mounted in the front bulkhead, and directs air down the ceiling to ensure an even flow of cold air throughout the bus eliminating drafts on the forward passengers. All the A/C components are mounted behind an attractive padded panel; only the vents are visible. Inside this enclosure the evaporator is surrounded by heavy insulation which increases the efficiency of the A/C and also quiets the noise of the A/C unit.

KSIR® E-Series Buses . (Some Items Shown are Optional) .Passenger Capacity Can Be Limited by Optional Selected.

Standard Features:

- All Galvaneal steel throughout including steps.
